Remarks/Arguments:

The applicant would like to thank the examiner for the telephonic interview on April 14,

2009, in which the claims and the prior art were discussed.

The above Amendments and these Remarks are in reply to the Office Action mailed

March 17, 2009.

Claims 22-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohtake, et

al. (InfoStick: An interaction device for Inter-Appliance Computing) and in further view of

Armstrong (U.S. Publication No. 2002/0000971).

Claims 22 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Rodriguez et al. (U.S. Publication No. 2002/0049978) and further in view of Armstrong.

Claims 22 and 31 have been amended to add the feature that "the information from six-

degrees-of-freedom sensor on the handheld controller is used to calculate a ray coincident with

the handheld controller; and wherein the source and sink devices are associated with respective

control windows and the determination of a source or sink device is done by calculating whether

the calculated ray would intersect one of the control windows". This feature is not shown or

made obvious by the cited prior art.

In light of the above, it is respectfully submitted that all of the claims now pending in the

subject patent application should be allowable, and a Notice of Allowance is requested. The

Examiner is respectfully requested to telephone the undersigned if he can assist in any way in

expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: May 27, 2009
